DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Shozo et al. (6,033,087)

3. The recitation “ a cargo light assembly for vehicles” has not been given patentable weight because it has been held that a preamble is denied the effect of a limitation where the claim is drawn to a structure and the portion of the claim following the preamble is a self contained description of the structure not depending for completeness upon the introductory clause.

4. Shozo discloses a white light emitting diode having an aperture for emitting a light beam in an arc of about 120 deg in horizontal and vertical planes and a lens for receiving the beam and reducing in a horizontal and vertical plane to about 60 deg and reducing the beam in the vertical plane to about 60 degrees (fig 1).

Allowable Subject Matter

5. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 8-10 are allowed.
